

The P. C. P. Alumni Report, Vol. 29 : November, 1892 (Classic Reprint)

Philadelphia College of Pharmacy

Excerpt from The P. C. P. Alumni Report, Vol. 29: November, 1892 Mr. J. L. Wilson, of Philadelphia, addressed the meeting upon the subject of Shaws gas-testing Machine, exhibiting the same. He claimed that it was possible to detect 1% per cent. Of mine gas with it, whereas the Davy lamp, under usual conditions, will not show less than two per cent. The machine is a form of double air-pump, having a permanent upright cylinder at one end, and a movable one attached to a graduated scale at the other end. Through the one cylinder passes either air or gases, and through the other passes the mine gas or illuminating gas. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works.
